Objective of the workshop

The objective of the workshop is to exchange the experience of project team members, representatives of cooperating organizations and the professional public regarding the development and perspectives of modern technologies in education in the area of civil protection with a focus on virtual reality. Digitalisation of the Czech Republic and the EU is the key to sustainable, free, secure and successful Europe in the constantly changing environment full of threats. During the workshop, practical demonstrations and excursions of the professional classroom of the Fire Rescue Service of the South Bohemian Region using virtual reality will be held. The event is intended for the professional public and it will be in Czech.

Registration

If you are interested, please register here by 17th November 2023. It is possible to attend the event online on the first day, attendance in person is not necessary!

To create a registration, scan the QR code or follow the link:
